DETAILED ACTION

Response to Amendment

1. As per Applicant's instructions as filed on 7/13/04, claims 1, 27, and 53 have been amended, and claims 2-26, 28-52, and 54-85 have been canceled.

Response to Remarks

2. Applicant's argument with respect to amended claims 1, 27, and 53 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 53 are rejected under 35 U.S.C. 102(e) as being anticipated by Sekiguchi et al (6,493,385 B1).

Regarding claims 1 and 53, Sekiguchi et al discloses a system and a method for coding video frames in a video compression system having coding mode biases, including:

means for inputting video frames to be compressed (Fig. 4, 201);

means (Fig. 4) for automatically scaling (variable) the coding mode biases for such video frames as a function of the number of bits used to represent samples of the input image for the video frames being compressed (col. 3, lines 7-24).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sekiguchi et al (6,493,385 B1).

Regarding claim 27, Sekiguchi et al discloses a system and a method for coding video frames in a video compression system having coding mode biases, including:

means for inputting video frames to be compressed (Fig. 4, 201);

means (Fig. 4) for automatically scaling (variable) the coding mode biases for such video frames as a function of the number of bits used to represent samples of the input image for the video frames being compressed (col. 3, lines 7-24).

Further, Sekiguchi et al discloses using a program for selecting the coding mode table to be used (col. 9, lines 1-11).

Furthermore, the Examiner takes official notice that computer program for coding video frames in a video compression system is well known in the art for **saving costs** associated with the hardware apparatus.

Therefore, it would have been obvious to a person of ordinary skill in the relevant art employing a system/method for encoding compressed video frames as taught by Sekiguchi et al to incorporate the computer program having instructions for causing a computer to perform all of the above limitations for saving costs associated with hardware apparatus.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
